SUMMARY

Frontend Developer with 1+ year of professional experience building scalable web applications across SaaS, fintech, POS, and real estate domains. Skilled in React.js, Next.js, TypeScript, and modern frontend architecture, with hands-on experience integrating payment gateways, real-time features, role-based access control, and third-party services. Leverages AI-assisted development tools including Kiro, Cursor, and GitHub Copilot to accelerate delivery and maintain code quality. Passionate about creating responsive, user-centric interfaces and delivering high-quality products in agile environments.

EDUCATION

Institute of Space and Technology

Bachelor of Science in Computer Science

Sep 2020 – Sep 2024

Islamabad, Pakistan

Punjab College of Information and Technology

Faculty of Science in Pre-Engineering

Sep 2018 – Apr 2020

Rawalpindi, Pakistan

EXPERIENCE

Frontend Developer

NextPak Agile Solutions

Oct 2025 – Present

Rawalpindi, Pakistan

- Developed and maintained production frontend features across 5+ client projects using React.js, Next.js, TypeScript, and Tailwind CSS in an agile team environment.
- Integrated payment gateways, real-time functionality, and third-party services including Stripe, Tap Payments, Algolia, SendGrid, and Firebase-based solutions.
- Built responsive interfaces, role-based user experiences, multi-step forms, and scalable state management solutions using Redux Toolkit, Zustand, TanStack Query, React Hook Form, and Zod.

MERN Stack Intern

NextPak Agile Solutions

Jun 2025 – Sep 2025

Rawalpindi, Pakistan

- Completed a 4-month internship focused on React.js fundamentals, component-based architecture, hooks, and frontend application development.
- Built reusable UI components, integrated REST APIs, and collaborated in a Git-based team workflow.

PROJECTS

Nexteats | React.js, Redux, Firebase, Stripe, PayPal, Algolia

Professional Project

- Implemented waiter-specific workflows including order management, payment collection, table handling, and customized bill printing interfaces.
- Contributed to a restaurant SaaS platform featuring real-time order tracking, QR ordering experiences, advanced search capabilities, and subscription management flows.
- Developed responsive and role-based user interfaces using React.js and Redux, ensuring a seamless ordering and payment experience across waiter, cashier, and customer-facing workflows.

NextPOS | React.js, Redux, Firebase, Stripe, Chart.js, ApexCharts

Professional Project

- Developed frontend features for a cloud-based POS system supporting inventory management, staff permissions, and business analytics.
- Built customizable receipt templates with QR/barcode generation, customer management workflows, and Stripe-powered subscription experiences.
- Delivered responsive dashboards, reporting interfaces, and real-time sales monitoring views across a large-scale component architecture.

UK eVisa Platform | React.js, TypeScript, Firebase, Tap Payments

Professional Project

- Built a multi-traveler application platform supporting up to 50 travelers per submission through a guided multi-step user experience.

- Implemented OTP verification flows, document upload interfaces, secure payment integration, and comprehensive form validation mechanisms.

NextSprint | Next.js, React.js, TypeScript, Socket.IO

Professional Project

- Developed collaborative Kanban-style project management features including drag-and-drop boards, task management, comments, labels, and file attachments.
- Built real-time collaboration experiences, subscription-based feature access, activity tracking interfaces, and AI-assisted productivity features.

Legal Insight | React.js, CSS, Node.js, Express.js, SSMS

Final Year Project

- Pioneered the development of a web-based platform aimed at improving the accessibility of legal judgments and court decisions.
- Designed and implemented advanced lawyer profiling features, streamlining connections between lawyers and potential clients.
- Utilized React.js with hooks (useState, useEffect, useContext) for state management, component communication, and ensured mobile responsiveness. Implemented an efficient search mechanism using RESTful APIs.
- Integrated email verification, password recovery via OTP and reset links, JWT-based authentication, and secure file uploads using Multer.
- Scraped over 10,000 case laws from Lahore, Peshawar, and Supreme Courts of Pakistan using Python libraries like BeautifulSoup, streamlining data collection and processing for legal databases.

TECHNICAL SKILLS

Frontend Technologies: React.js, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, Shadcn/UI, Radix UI, i18next

State Management: Redux Toolkit, Zustand, TanStack Query, Context API

Forms & Validation: React Hook Form, Zod, Yup

Payments & Integrations: Stripe.js, Tap Payments, Algolia, Firebase SDK, Supabase JS Client

Developer Tools: Git, VS Code, Jira, Postman, Figma, Kiro, Cursor, GitHub Copilot, ChatGPT, Claude

AI-Assisted Development: Prompt engineering for rapid UI development and code generation, AI-assisted debugging and code review, LLM API integration (OpenAI, Google Gemini)

Cloud & Deployment: Firebase Hosting, Vercel

Development Methodologies: Agile, Scrum
