SUMMARY

I'm a CS graduate with a passion for building dynamic and user-friendly websites. Over the course of my studies, I have applied classroom knowledge to develop real-world tech solutions. Specializing in MERN stack development, I have honed my skills in creating responsive, full-stack web applications that provide seamless user experiences. Whether it's building intuitive frontends or working on scalable backends, I'm eager to contribute to impactful projects in the tech industry.

EDUCATION

Institute of Space and Technology

Bachelor of Science in Computer Science

Punjab College of Information and Technology

Faculty of Science in Pre-Engineering

Sep 2020 – Sep 2024

Islamabad, Pakistan

Sep 2018 – April 2020

Rawalpindi, Pakistan

EXPERIENCE

Android Developer Intern

Apptrick, Islamabad

Jul 2023 – Aug 2023

Islamabad, Pakistan

- Developed multiple Android applications utilizing Kotlin and XML, showcasing proficiency in modern app development practices.
- Completed a comprehensive 6-week training program, enhancing skills in Android SDK and user interface design.
- Collaborated effectively in team settings, contributing to the successful deployment of feature-rich applications on the Android platform.

PROJECTS

Legal Insight | React.js, CSS, Node.js, Express.js, SSMS

Final Year Project

- Pioneered the development of a web-based platform aimed at improving the accessibility of legal judgments and court decisions.
- Designed and implemented advanced lawyer profiling features, streamlining the connection between lawyers and potential clients.
- Integrated email verification during signup, forgot password functionality using both OTP via email and reset email, and login authentication with JWT tokens for enhanced security.
- Developed a library of 10k case laws with an efficient search system, improving access to legal documents.
- Implemented a document-based verification of lawyers for professional authenticity.

My Portfolio | React.js, CSS, Bootstrap

My Own Project

- Developed a personal portfolio website using React.js, CSS, and Bootstrap to showcase projects and skills, with a focus on clean, responsive design and user-friendly interface.

Ransomware Detection and Defense System | Python

Semester Project

- Designed a ransomware defense system to monitor CPU and drive activity, detect suspicious file modifications, and identify encryption attempts by analyzing file entropy. Implemented honeypot folders and proactive alerting mechanisms to safeguard files from ransomware attacks.

DevOps-Driven Web Application | PHP, CSS, GitHub Actions (CI/CD), Jira

Semester Project

- Executed advanced DevOps strategies to automate deployment, facilitate continuous collaboration, and elevate development efficiency.

Monoalphabetic Cipher Decipher Algorithm | Python

Semester Project

- Implemented a Python algorithm to decode monoalphabetic ciphers by leveraging frequency analysis techniques.

AI Model for GPA Forecasting | Python, Pandas, NumPy, Scikit-Learn, Tkinter **Semester Project**

- Trained a model to forecast semester GPAs based on historical data and various influencing factors. Tested results using five different AI models and implemented a Tkinter-based GUI for user interaction and result visualization.

School Bus Tracking App | Kotlin, XML, Firebase **Semester Project**

- Designed and developed an Android application to empower parents to track their child's school bus in real-time for enhanced security and peace of mind.

TECHNICAL SKILLS

Languages: JavaScript, Python, C#, C++, SQL, HTML, CSS, Kotlin, XML

Frameworks & Libraries: Node.js, React.js, Express.js, Pandas, NumPy, Matplotlib, Scikit-Learn

Developer Tools: Git, Terraform, JIRA, Wireshark, IDA, VS Code, Android Studio

Cloud Technologies: GitHub Actions (CI/CD), Google Cloud, AWS

Development Methodologies: Agile, Scrum
